

WASTE ASSESSMENT

Let's work together to make your school sustainable. We identify your waste challenges, help you find solutions and make positive changes.

SET GOALS

We discuss what changes you are prepared to make and help you define what your ultimate goal is.

ASSESS WASTE

We review and categorize your current waste and cross reference that with your purchase orders. Then we make recommendations based on the data.

MAKE CHANGES

We help you implement changes through 3 visits, 1 every 3 months. Changes include staff practices, alternative sustainable products and communication strategies.

MAKE VIETNAM HEALTHIER

The waste we throw away ends up in our oceans and rivers. It kills fish and poisons the food we eat. We must take responsibility and fix this. The best way to do that is reduce our waste.

TEACH BY EXAMPLE

Kids learn the most when observing the actions of teachers and adults. By changing your schools practices they will become a natural habit for the students for the rest of their lives.

THIS PROGRAM IS FREE

Your school does not need to pay for this assessment thanks to a generous grant from the Hong Kong Business Association of Vietnam. Some changes, such as switching to sustainable alternatives, may cost money.
